Integrated POS Gift Card Program

Gift Card programs only- Loyalty programs are integrated into POS software

Due to the various different POS setups that merchants have we will try and work with the local dealers or VAR's but in most cases we can perform the installation over the remote dial access into the back office PC that the software is running on.

It is important to schedule the integration around the merchant's hours of operation. We will coordinate these dates and times with the sales reps and merchants to make sure this process is completed on schedule.

All systems must have the following configured & installed before final integration.

Required Items:

- Contact your POS dealer about Gift Card Module and Key (if needed)
- Phone line for dial up connection or IP/DSL line (connected to back office PC)
- External USB modem for all systems using dial connectivity to the host.
- If using IP or high speed DSL a router will need to be installed and configured.
- Back office PC that runs the software must have PC Anywhere or other dial term software so we can connect remotely and configure the system.
- We must have a manager or owner on site the day we go live.
- Need time scheduled after systems are configured to train managers/owners.

NOTE: POS Install Fee per location is \$125

If Install scheduled outside of normal business hours is an additional \$75.
OPT integration hours of operation 8am-5pm (MST) Mon-Thurs Only.
No Installations performed on Fri, Sat, or Sun.

NOTE: Some dealers may charge fees to setup the hardware or configure the software to accommodate the programs.

The following POS systems are compatible with the Gift card programs. *Updated 5-17-06*

Supported POS software list

POStouch (V 5.29 or above)	Micros 3700 (9700 in beta)
Aloha minimum version is v 5.27 5.27.140 (NOT SUPPORTED)	Matre'd w/data cap (POS dealer must perform the install and support the merchant on tech support issues)
